

AUTOMATIC VACUUM SYSTEM DESIGN

ISO 9001:2000

- Automatic vacuum system can place blind rivet into nosepiece without hand operation and left mandrel will move into collection bottle automatically.
- An adjustable switch can control the air volume into the riveter for better air consumption.
- Light weight design for heavy duty operation to all materials of blind rivets.

| Item No. | Description | Weight | Air Pressure | Stroke | Capacity |
|----------|--|----------|----------------------|--------|--|
| SR-1 | Superior Air Riveter with Automatic Vacuum System Design | 1.3 kgs | 60-95 psi 4-7 kgf | 20mm | blind rivets up to 4.8mm(3/16") for all materials |
| SR-2 | Superior Air Riveter with Automatic Vacuum System Design | 1.45kgs | 70-95 psi 5-7 kgf | 20mm | blind rivets up to 4.8mm(3/16") for all materials, & 4.8mm(3/16") monobolt rivet |
| SR-3 | Superior Air Riveter with Automatic Vacuum System Design | 1.70 kgs | 70-95 psi 5-7 kgf | 26mm | blind rivets up to 6.4mm(1/4") for all materials, & 6.4mm(3/16") monobolt rivet |
